

The Immune System and Auto Immune Illness

Keynote speakers

Dr Philipp Busche and Dr Judit Kedves

Friday November 8- Sunday November 10

The Boatshed Wellington New Zealand

The growing difficulty to incarnate into the earthly body is mirrored in the dramatic increases in autoimmune diseases. How can we as health and therapy professionals work with this challenge in all of the many ways these illnesses are expressed in our patients? What tools can anthroposophic medicine and therapy offer towards understanding and healing? We warmly invite you to our conference study weekend led by our keynote speakers from Arlesheim Hospital and the Ita Wegman Clinic.

Dr Philipp Busche and Judit Kedves are physicians at the Anthroposophic hospital in Switzerland. Philipp is the head of Internal Medicine with specialisation in internal medicine and gastroenterology while Judit is a specialist in internal medicine at the hospital's outpatient clinic. Along with their medical roles, Judit and Philipp carry responsibility for the in-hospital and online trainings in Anthroposophic Medicine and the Clinical Case Study Courses. They are very much looking forward to meeting and working with the health and therapy community here in the South Pacific.

The conference takes place at The Boatshed on Taranaki Wharf in central Wellington, a short stroll along the waterfront from Te Papa Museum. The venue is within walking distance to all types of accommodation, and is a short journey to the airport, train and bus stations. There is a range of car parking in close vicinity.

See the timetable below. Any questions? Email conference@weledatrust.org.nz
